Claim Objections

Claim 1 describing an anti-cellulite formula is objected to because of the following informality: improper claim form including claim placement and numbering (**see M.P.E.P 608.01 (j)**). The claim(s) are narrative in form and replete with indefinite and functional or operational language. The components, which go to make up the formula or method, must be clearly and positively specified. The components must be organized and correlated in such a manner as to present a complete operative invention. The claim(s) must be in one sentence form only, should not include periods within the claim and should begin at the top of the page . Note the format of the claims in the patent by **Morice, PN 6623767**.

Specifically, applicant is required to follow specific guidelines as described in **M.P.E.P 608.01 (m)**. Additionally, the following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.

Art Unit: 1609

- (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet without extraneous details (i.e. letter heads information, application number, invention title and without periods or commas in claims).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

In particular, applicant is reminded of the proper content of an abstract of the disclosure.

A patent abstract is a concise statement of the technical disclosure of the patent and should include that which is new in the art to which the invention pertains. If the patent is of a basic nature, the entire technical disclosure may be new in the art, and the abstract should be directed to the entire disclosure. If the patent is in the nature of an improvement in an old apparatus, process, product, or composition, the abstract should include the technical disclosure of the improvement. In certain patents, particularly those for compounds and compositions, wherein the process for making and/or the use thereof are not obvious, the abstract should set forth a process for making and/or use thereof. If the new technical disclosure involves modifications or alternatives, the abstract should mention by way of example the preferred modification or alternative.

The abstract should not refer to purported merits or speculative applications of the invention and should not compare the invention with the prior art.

Where applicable, the abstract should include the following:

- (1) if a machine or apparatus, its organization and operation;
- (2) if an article, its method of making;
- (3) if a chemical compound, its identity and use;
- (4) if a mixture, its ingredients;
- (5) if a process, the steps.

Extensive mechanical and design details of apparatus should not be given.

Art Unit: 1609

Overall, the language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claim 1 is also rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention (see **M.P.E.P 608.01 (k)**).

Claim 1 is particularly vague and indefinite given that applicant is claiming an anti-cellulite formula (in **sentence 1**) and a 4-stage program (**possible method in sentence 3**) using said formula. Furthermore, applicant claims nutritional food, a supplement, an antioxidant, a detoxifying method which may or may not use said formula, a fitness plan, a dry body brush, and a topical essential oil blend which were all undefined or unexplained in the specification. Applicant did not particularly point out what nutritional foods may be encompassed in the invention, nor were the supplements and antioxidants defined. In addition, a fitness plan was not delineated nor was a dry body brush described in the aforementioned disclosure. Furthermore, applicant alluded to the use of topical essential oils but did not make clear if the oils were to be as the anti-cellulite formula or not.

Art Unit: 1609

As a result of the above inconsistencies, the aforementioned claim is unable to be examined as disclosed given that the scope of the claimed subject matter would not be able to be determined by one of ordinary skill in the art.

Conclusion

No allowable claim (s) at this time
